Education

University of Waterloo **Waterloo, ON**
Bachelor of Computer Science, Co-op *GPA: 3.7/4.0*

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C, C#, HTML, CSS, SQL
Frontend: React, React Native, Next.js, Angular, Tailwind CSS
Backend & Infrastructure: FastAPI, ASP.NET Core, Node.js/Express, Docker, Kubernetes
Cloud & Databases: AWS, Azure, Google Cloud Platform, MongoDB, PostgreSQL, MySQL, Supabase, SSMS,
Developer Tools: Git, Linux, Postman
Certifications: AWS AI Practitioner - Issued 2025 (Machine Learning, AWS AI/ML Services, Cloud Computing)

Experience

Full Stack Developer **May 2026 - Present**
Ontario Power Generation *TypeScript, React, C#, ASP.NET Core, Azure, SSMS, Docker, Kubernetes*

- Designed and built Construction Hub, consolidating **3** legacy applications into a unified **React + ASP.NET Core** platform serving **500+** users and delivering **10x** faster application performance.
- Automated construction quality reporting from field data capture to PDF generation and analytics, processing **100+** reports monthly and reducing manual reporting effort by **70%**.
- Migrated Project Workbench from **Angular** to **React/TypeScript**, and optimized **.NET** backend services and data access, cutting end-to-end response times by **30%** across **10,000+** work orders.

Software Developer **Jan 2026 - Mar 2026**
Accelerate Alberta | GitHub | Live *React, Next.js, TypeScript, Resend*

- Built and launched Accelerate Alberta's production **Next.js/React** website, improving page responsiveness by **25%**, achieving **100%** form submission reliability, and strengthening **SEO** and organic search visibility through performance and content optimization.

Software Developer **Oct 2025 - Dec 2025**
UW Electrium Mobility - Request Platform Website | *GitHub* *Next.js, TypeScript, SupaBase, PostgreSQL, NextAuth*

- Developed an internal **Next.js/TypeScript** task-tracking platform for **20+** team members, reducing manual project tracking by **40%** through reusable workflows and **Supabase/PostgreSQL** integration.

Projects

CityWatch - HackCanada 2026 Hackathon | *GitHub* *React Native, TypeScript, Expo, Node.js, MySQL, Gemini API*

- Led a team of **4** to build a cross-platform **React Native** mobile app enabling crowdsourced reporting of infrastructure damage, integrating **Mapbox** APIs to visualize risk across **100+** geospatial grid cells in real time.
- Designed a geospatial data pipeline using **Supabase**, **PostgreSQL** and **PostGIS** to process and aggregate **50,000+** infrastructure reports, enabling dynamic heatmap generation and spatial queries for identifying high-risk zones.
- Engineered a multi-service backend using **Node.js**, **Express** and **FastAPI**, orchestrating **3** external APIs (**Mapbox**, **OpenWeatherMap**, **Gemini**) to enrich reports and deliver real-time analytics with reduced processing latency.

NutriLens - Technova 2025 Hackathon | *GitHub* *React Native, TypeScript, Expo, Node.js, MySQL, Gemini API*

- Led **4** developers to build a **React Native app** in **TypeScript** with **Expo's barcode scanner** to scan packaged foods and fetch nutrition details from OpenFoodFacts, Nutritionix, and USDA databases.
- Implemented a health-condition filter that flags scanned foods conflicting with user dietary or medical restrictions, achieving **90%** accuracy.

MailGest | *GitHub* | *Live* *React, JavaScript, Node.js, MongoDB, Gemini API, OAuth*

- Engineered a full-stack **LLM**-powered email summarization platform that surfaces high-priority messages and reduces time spent scanning large inboxes by **50%**.
- Designed an end-to-end data pipeline that authenticates users via **Google OAuth** and transforms email metadata into structured inputs for **Gemini AI** summarization.
- Implemented session-aware **REST APIs** that cache **AI**-generated email summaries per user, reducing recomputation by **20%** and API costs by **30%**.
